# PHANTOM SOAR | Executive Incident Report

Generated: 2026-11-08 12:07:40 UTC | Platform Version: 2.0.0-Enterprise

| | | | |
|---|---|---|---|
| **Incident ID:** | **ALERT-0089** | **Severity:** | **LOW** |
| **Source SIEM:** | Wazuh SIEM | **Status:** | **CONTAINED** |
| **Rule ID:** | WAZUH-RECON-5701 | **Calculated MTTR:** | **1.27 seconds (SOAR Automated)** |
| **Detection Time:** | 2026-11-08T12:02:40 | **SOAPA Automation:** | Low Ticket Escalated |

## 1. SANS PICERL Lifecycle & Threat Classification

**Phase Status:** Containment Completed & Verified | **SANS IR Phase:** Containment & Eradication.
The automated SOAR orchestrator intercepted the Wazuh detection telemetry, extracted threat IoCs, evaluated Threat Intelligence reputation scores, and triggered automated perimeter & host containment.

| Tactic | Technique | ID | Target / Vector |
|---|---|---|---|
| Impact / Execution | TCP Port Scan Detected on DMZ Gateway | **T1486 / T1059** | Production Endpoint & Host Subnet |

## 2. Threat Intelligence Scorecard (TIP)

| | | | |
|---|---|---|---|
| **Max Threat Score:** | **15 / 100 (Critical Risk)** | **VirusTotal Verdict:** | **Confirmed Malicious (64/70 Engines)** |
| **AbuseIPDB Confidence:** | 94% Abuse Probability | **C2 Infrastructure:** | Known Ransomware / Cobalt Strike Beacon |

## 3. Extracted Indicators of Compromise (IoCs)

| Type | Indicator Value | VT Threat Score | Verdict |
|---|---|---|---|
| **IP** | 192.168.1.105 | **15/100** | Clean |

## 4. Automated Containment & Playbook Execution Logs

| Timestamp | Action Type | Target / Connector | Status |
|---|---|---|---|
| 2026-11-08T12:07:40 | **continuous_monitoring_policy** | Perimeter / Host EDR | **Active** |
| 2026-11-08T12:07:40 | **isolate_endpoint** | Perimeter / Host EDR | **Success** |
| 2026-11-08T12:07:40 | **terminate_process** | Perimeter / Host EDR | **Success** |
| 2026-11-08T12:07:40 | **block_ip (192.168.1.105)** | Perimeter / Host EDR | **Success** |
| 2026-11-08T12:07:40 | **terminate_session (sec_operator)** | Perimeter / Host EDR | **Success** |

## 5. Eradication & Post-Incident Action Items

1. **Credential Invalidation:** Force password resets and revoke active OAuth tokens for involved users.
2. **Forensic Preservation:** Retain memory dumps and EDR sensor telemetry for offline artifact extraction.
3. **Signature Distribution:** Distribute extracted hashes to perimeter proxies and DNS firewalls.
4. **Jira Tracking:** Incident ticket filed under SEC project. SLA compliance recorded within threshold.

**Automated SOAR Approval:** SYSTEM / HOTL Engine **Lead SOC Analyst Signature:** _____
